For some, a snack
For some, a day's MEAL

“

Problems / Solution Overview

Due to not instant notifications, lacking location and food detail informations and not instantly updating portion of food when receiving,

People who wants to get food often struggle to receive remaining food or discounting food.

Once the food is sharing, wasteFULL empowers users to receive remaining food with **instant** and **detailed** information, accompanying with **location based** view point.

Requester

Problems / Solution Overview

Due to not accurate lining up condition, no detailed health condition who pick up the food and complex sharing process, People who wants to share food often struggle of how to easily and safely share food.

Once user needs to share the food, wasteFULL empowers users to share remaining food with **user-friendly** interface, **filtering** the user with not suitable health condition (like allergies), accompanying with **location based** view point.

Suppliers

Three Tasks

simple

Supplier : Share food instantly
Requester : Find nearby remaining
food with latest information

medium

Supplier : Share food using
filtering mechanism
Requester : Notified by App
instantly and with food detail

complex

Supplier : share food with
line-up system
Requester : Notified by App
and line up for food

Storyboard (Simple)

Heavy Rainy day

Split scene : no one leave home

Restaurant Owner : "No one wants to leave their dotm"

Ready to post on fb, then see the ad, and use the app to post info

05

Receiver(a student) is walking out of the school,

The student looks at his wallet, and realized he doesn't have much money left

07

Find out 711 is too far from the location, decide to use the app

Find the nearby restaurants post and take the food heapily

Storyboard (Medium)

On some event arena,
Event holder found out there
are seafood pizza left

The event holder decided to
post on the app

The event holder was worried
that there might be people
with seafood allergy

So, he decided to use the filter to
ensure that the app only notifies
users who are nearby and are not
allergic to seafood

Two friends walking pass the
event arena, one get notified
but one do not.

One asked : why don't
you get notifications.

Browsing the food detailed
then find out the filter tag.
One answered : Maybe you
are allergy to seafood

One of the friends pick up the
seafood pizza and the other
one was jealous

Storyboard (Complex)

Requester was in line at a restaurant for discounted food, but they ran out of food before it was his turn.

The requester was hungry and frustrated, so he decided to open the app and look for other discounted food

The app shows that there are 10 remaining servings and the requester successfully lined up for the food

The requester gets to the restaurant in the required time

After arriving at the restaurant, the requester clicks the arrive button, the owner gets notified and gives him his serving

The requester leaves the restaurant happily with the discounted food in hand.
